PURPOSE

Mechanical Engineering student focused on aircraft and drone design, with hands-on experience in SolidWorks, ANSYS, XFLR5, and nTop for mechanical design, aerodynamic analysis, structural simulation, topology optimization, and mathematical modeling. Seeking to contribute to advanced aerospace projects through practical experience in design, analysis, and manufacturing.

EXPERIENCE

Mechanical Design Team Member | Nov 2024 – Present

ETÜKEN UAV Team, Erzurum / Türkiye

- Designed aircraft and drone systems in SolidWorks; performed structural analyses in ANSYS Mechanical and aerodynamic analyses using XFLR5 and ANSYS Fluent.
- Manufactured aircraft structures under vacuum using epoxy resin and fiberglass; produced the drone fuselage through CNC aluminum cutting and completed the required assembly operations.
- Performed geometry optimization, flow analysis, and structural analysis for aircraft and drone systems.

Project Team Member | [September 2025 – Present]

Makist R&D Engineering, Erzurum / Türkiye

- Contributed to the development of a driverless test vehicle system for trailer rear-impact safety tests.
- Worked on the steering control and release mechanism used during the impact test process.
- Supported the evaluation of a patented energy-absorbing trailer safety system.

Animation and Post-Process Specialist | [Jul 2025 – Dec 2025]

ADD4BIO, Erzurum / Türkiye

- Performed post-processing operations on manufactured titanium and PLA parts, including sanding and polishing, and supported related production processes.
- Created surgical animations and technical visualizations in Blender to support doctors during patient-specific implant procedures.

EDUCATION

Erzurum Technical University | 2022-Present

Mechanical Engineering

- GPA: 2.43/ 4.00

SKILLS

Technical Skills

- CAD Software: SolidWorks, AutoCAD, Blender, Siemens NX
- Analysis & Engineering Software: ANSYS Mechanical, ANSYS Fluent, nTop, XFLR5, MATLAB
- Topology Optimization & Mathematical Modeling: nTop
- UAV Systems: Aircraft and drone development, design, manufacturing, and flow analysis
- FPV Drone Operation and Piloting

PERSONAL SKILLS

- Simulation-driven problem solving
- Self-directed technical learning
- Precision-focused working approach
- System-oriented thinking
- Design-to-manufacturing mindset

LANGUAGES

Turkish (Native) | English (B2)
